ORIGINAL SKUNK #1

Original Skunk #1 is the direct descendent of the famous Skunk line that began with the legendary Skunk #1 which was created by Sacred Seeds way back in the late 1960s - early 1970s when cross-breeding different cannabis strains for desired characteristics was seeing the first fruits of its labours. It was introduced to the Dutch as the first stabilised cannabis hybrid strain. Bred by crossing Afghani indica together with Mexican "Acapulco Gold" and Colombian Gold sativa strains.

FLOWERING TIME: 9 Weeks

BREEDER: Seedsman

YIELD: Indoors: 350-450 gr/m²
Outdoors: High

BLUE DREAM

Blue Dream has two top-rated parents in Blueberry and Super Silver Haze. This Californian weed strain is 70% sativa which produces high THC levels in under 10 weeks of flowering. It has great hybrid vigour and is a very strong and stable plant. It tends to stretch quite a lot during flowering and so indoor growers are encouraged to veg. for a short time only in order to keep it well under control. Outdoors it can reach a height of up to 4 meters!

FLOWERING TIME: 60-70 Days

BREEDER: Humboldt Seed Organization

YIELD: Indoors: 350-500 gr/m²
Outdoors: 2-3 kg/plant

They took their Sour Og male and crossed it to the Original Sour Diesel clone to start their Original Sour Diesel line. The seeds produce a very uniform structured plant extremely similar to its mother. Very resinous extremely stinky so odor control is a must, great branching and cloning, all around great seed line. This clone is what everyone on the east coast thinks of when they think of sour diesel. Straight sour kerosine funk to the max.

FLOWERING TIME: 8-9 Weeks

BREEDER: Cali Connection

YIELD: Indoors: 400-550 gr/m²
Outdoors: High

One of the most talked about and arguably strongest strains of recent years, is the Insanely sticky Gorilla Glue. Huge amounts of resin and a great sour piney aroma make this a great variety to work with; so Bomb Seeds have given it the full Bomb treatment! They were very fortunate to be given a clone of the #4 pheno back in early 2013 and immediately began to cross these outstanding genetics with their very own signature THC BOMB.

FLOWERING TIME: 9-10 Week

BREEDER: Bomb Seeds

YIELD: Indoors: 400-550 gr/m²
Outdoors: High

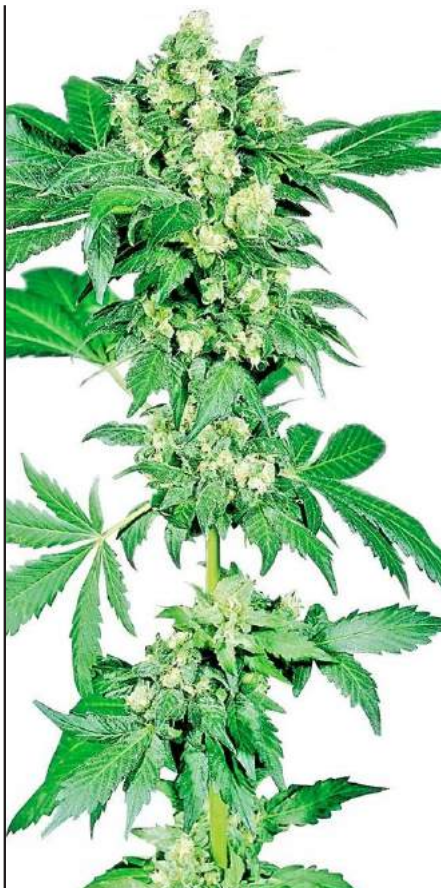

D I E S E L

Diesel is a strain that was created originally in the USA. Diesel is a cross of a Mexican Sativa plant with an Afghani Indica to produce a cannabis strain that is 60% sativa and 40% indica. Diesel is a high-quality marijuana that provides a feast for the senses. It is easy to grow and can become a big plant outdoors in temperate/Mediterranean climates or in a greenhouse.

FLOWERING TIME: 9-10 Weeks

BREEDER: Dinafem

YIELD: Indoors: 475 gr/m²
Outdoors: 950 gr/plant

A F G A N I

1

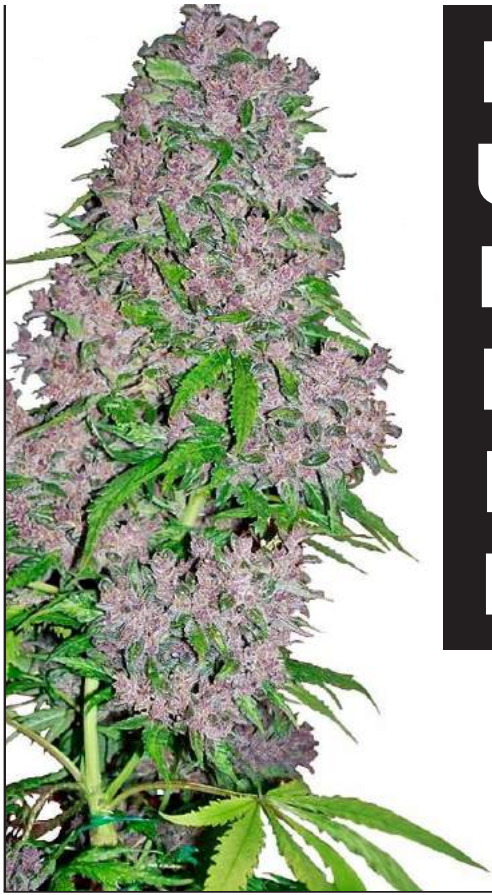

Afghani #1 feminised gives growers the opportunity to grow a classic indica hash plant without the fear of unwanted male plants in the grow room. Robust, fast to flower and highly resinous this strain has been bred from the finest Afghan hash plants which were adapted to high-altitude, mountain climates to produce masses of THC-bearing resin in a short season..

FLOWERING TIME: 45-55 Days

BREEDER: Sensi Seeds

YIELD: Medium-High

PURPLE BUD

Purple Bud is a powerful, prodigious-yielding Afghani indica strain that has been blended with a little sativa genetics. This plant has a marked tendency to display vivid purple colouration towards the end of the flowering cycle especially when night-time temperatures drop and the surrounding air becomes much cooler. It is a very simple plant to grow and even prospers outdoors in temperate (i.e. northern European) climates.

FLOWERING TIME: 60-75 Days

BREEDER: White Label

YIELD: Moderate

STRAWBERRY COUGH

Strawberry Cough is a joint North America/European production and is 80% sativa. It has a fantastically fruity taste and a wonderfully relaxing effect that has therapeutic properties. Strawberry Cough is a beautiful, medium-sized plant that grows indoors and in greenhouses unless you live in a region with a warm climate such as is found in the Mediterranean. With cooler temperatures at night it will turn colors.

FLOWERING TIME: 9 Weeks

BREEDER: Dutch Passion

YIELD: Medium +

AK48

AK48 is an indica-sativa hybrid cannabis strain that contains the genetics from the following strains: Colombian Gold, Thai, Mexican and Afghani. Since the mid-1990s it has attracted a large army of fans due to its speed of flowering, its quality and effect. AK48 is a very easy-to-grow marijuana strain that can finish flowering in 48 days. If harvested at this point the effect will be more of an uplifting sativa high.

FLOWERING TIME: 9 weeks

BREEDER: Nirvana Seeds

YIELD: Indoors: 400-500 gr/m²

SKYWALKER

KUSH

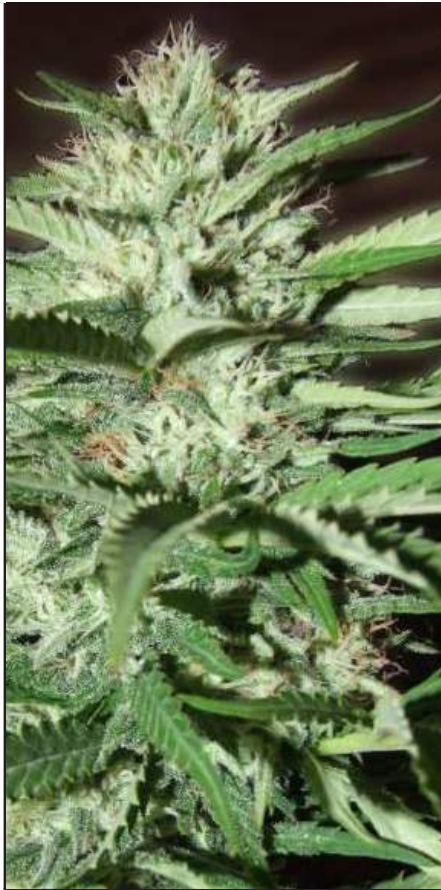

When people ask for a good yielding OG Kush variety they are talking about the Skywalker Kush! This is a very sought after clone in the States and now DNA Genetics are very proud to present this strain to the world. The Skywalker Kush tastes similar to their OG Kush, but the yield has increased a lot.

FLOWERING TIME: 8-9+ Weeks

BREEDER: Reserva Privada

YIELD: 500-600 gr/m²

Blue Hash is an indica-dominant cannabis strain that was bred by crossing a California Hash Plant with Blueberry. It has a great combination of flavour, power and yield. It is a very robust plant that can handle harsh, cold and humid conditions. Blue Hash underwent an extended testing period outdoors in very humid conditions with only the best plants being selected for each generation.

FLOWERING TIME: 7-8 Weeks

BREEDER: Dinafem

YIELD: Indoors: 475 gr/m²

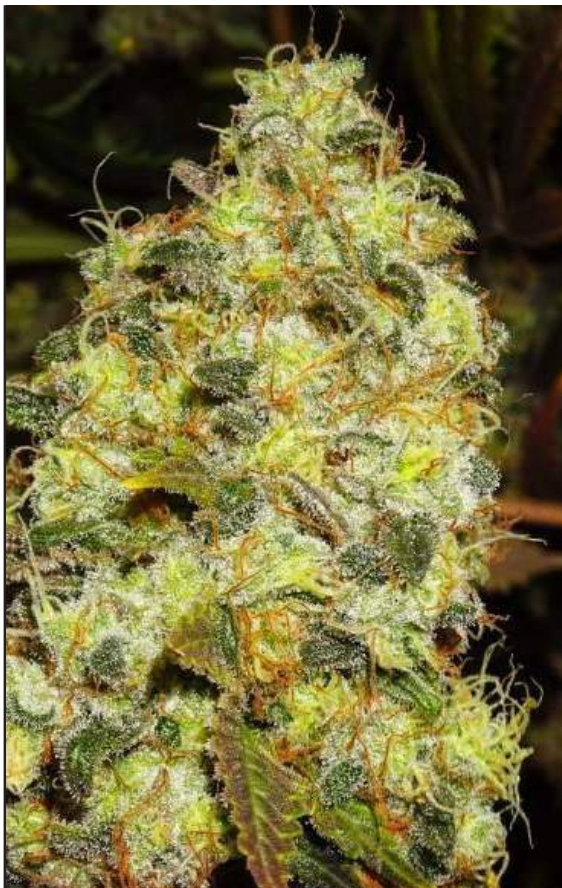

818 HEADBAND AKA SOUR KUSH

This cross is Cali Connection Original Sour Diesel cut which is known as AJ's cut aka Asshole Joe aka Weasel as in the first cut to come out of his room of the Famous Sour Diesel collection.. This cut was crossed to CC SFV OG Kush IBL male. She can easily become one of your personal favorites real fast.. The off spring shows great structure and solid kolas with fuel sour kerosine funk.

FLOWERING TIME: 8 Weeks

BREEDER: Cali Connection

YIELD: 800+ gr/m²

ICE

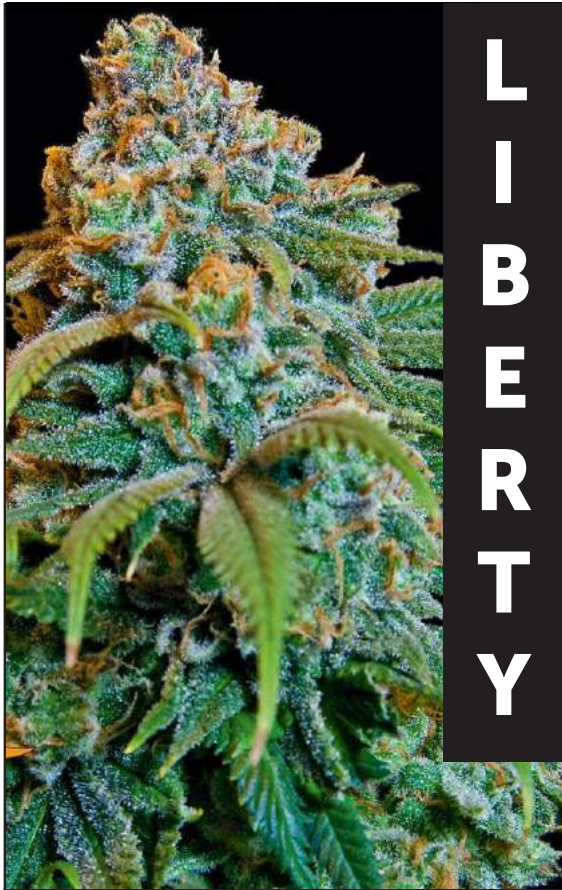

Ice is an indica-dominant four-way cross between Skunk#1, White Widow, Northern Lights and Shiva. Thousands of plants were used for the selection process to create Ice which brings together the twin attributes of quality and quantity. Resin production is spectacular which gives it its name. In 1998 Ice was winner of the Cannabis Cup.

Chemdawg is an indica-dominant marijuana strain that was originally grown from a seed in a particularly nice batch of bought weed. It is the parent strain from which both OG Kush and Sour Diesel were bred. Very high potency strain. Chemdawg is 60% indica, 40% sativa and is derived from the original Chem '91 clone grown from that bag of weed more than a quarter of a century ago. It puts out a fabulous display of colours which varies from yellow right through the spectrum to purple. Outdoors growers can get between 2 - 3 kilos each from plants that can grow to a height of more than 4 meters. Harvest will be by the beginning of October in northern latitudes. It has good moisture resistance.

FLOWERING TIME: 9 Weeks

BREEDER: Humboldt Seed Organization

YIELD: Indoors: 350-525 gr/m²
Outdoors: 2-3 kg/plant

9 9

Cinderella 99 (C99) is claimed by Female seeds to be the cannabis equivalent of the holy grail. This is because it manifestly displays attributes normally associated with land-race sativa strains and yet finishes flowering in approximately a quarter of the time. Yields are very high and both aroma and flavour are intensely fruity resembling grapefruit and pineapples.

FLOWERING TIME: 7-8 Weeks

BREEDER: Female Seeds

YIELD: Indoors: 400-500 gr/m²
Outdoors: 650-750 gr/plant

W H I T E

W I D O W

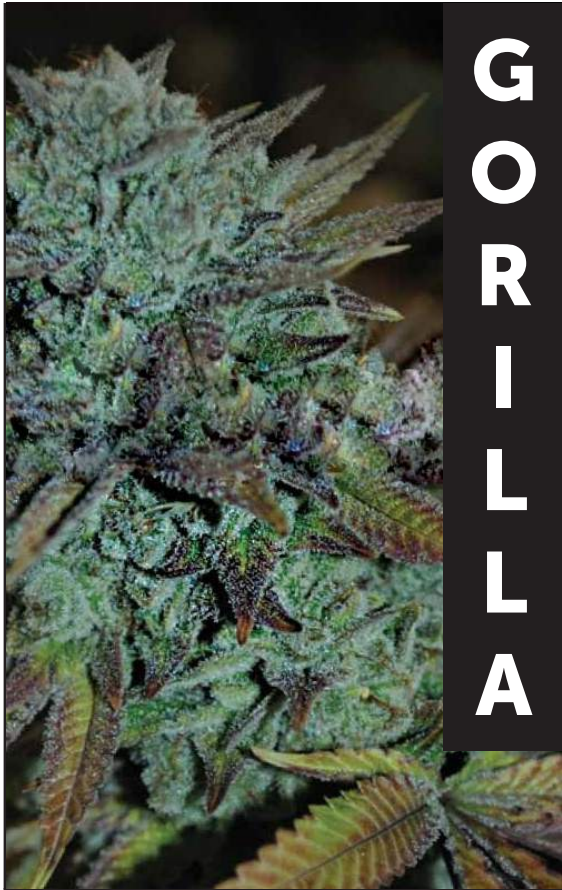

White Widow is one of the best-known, and still one of the most potent, cannabis strains in the world. Originally created in the early 1990s its release to the coffee-shops of Amsterdam was met with universal rave reviews as canna-tourists flocked in their thousands to find out whether all the advance publicity for this white strain was true. It was and remains so today.

FLOWERING TIME: 8 Weeks

BREEDER: Seedsman

YIELD: 8 Weeks

G O R I L L A # 4

Gorilla Glue #4 is an incredibly potent cannabis strain that had a serendipitous beginning by virtue of an accidental pollination. Gorilla Glue's genetic constituent parts are derived from Chem Sis, Chocolate Diesel and Sour Dubb marijuana plants and is 75% sativa. Buds are very fat and dense and are literally stuffed with trichomes exuding resin. This strain isn't called "Glue" for nothing as it will stick the blades of manicuring scissors together such is the amount of resin produced.

FLOWERING TIME: 58-63 Days

BREEDER: Expert Seeds

YIELD: Indoors: 400 gr/m²
Outdoors: 700 gr/plant

C H O C O L O P E

Chocolope is a feminised cannabis strain that is 95% sativa. Chocolope grows big and tall producing heavy yields in the process. Great beginner's strain due to its ease of cultivation. Originally named D-line, Chocolope is a cross of an Original Chocolate Thai female with a Cannalope male plant. Planted directly in the ground production is likely to be very high just like the grower after drying and curing the buds. It is tolerant of high temperatures and humidity as it has a good resistance to mould.

FLOWERING TIME: 9-11 Weeks

BREEDER: DNA Genetics

YIELD: 500-600gr/m²

P O W E R A F R I C A

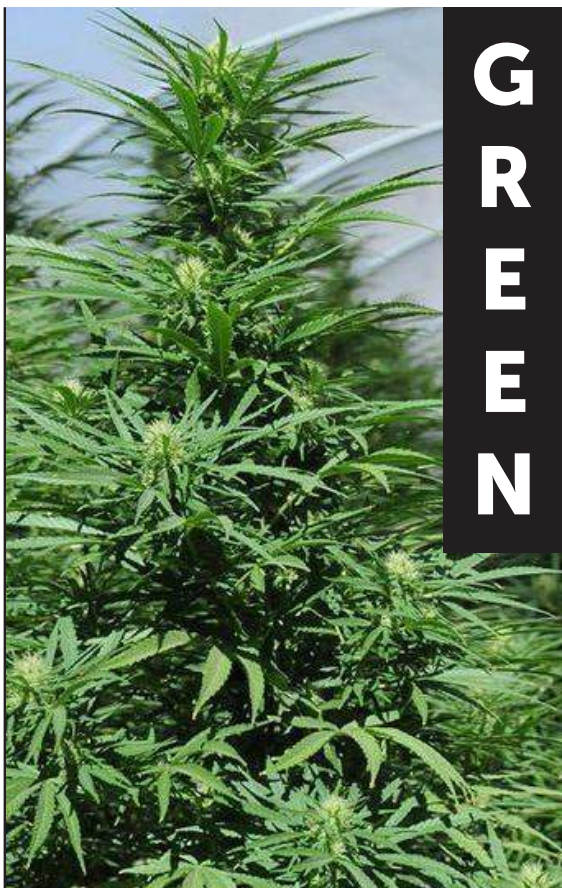

F A S T

Power Africa Fast version reduces the flowering and maturation of the original Power Africa by more than a week. Already a quick strain this Durban Poison-based plant has been crossed with a fast-maturing male to deliver your prized buds even faster. Power Africa Fast is even better suited to cultivation outdoors or in a greenhouse being ready during September which is, hopefully, before the weather takes a turn for the worse.

FLOWERING TIME: 6-7 Weeks

BREEDER: Seedsman

YIELD: 450-550 gr/m²

G R E E N

C R A C K

Green Crack was born when a 1989 Super Sativa Seed Club Skunk #1 was crossed with an isolated Afghani cutting thereby creating this sativa-dominant, vigorous, Christmas tree-structured plant. Green Crack is 60% sativa and can grow into a large plant if left to its own devices outdoors. This plant shows a very good resistance to both mold.

FLOWERING TIME: 55 Days

BREEDER: Humboldt Seed Organization

YIELD: Indoors: 350-525 gr/m²
Outdoors: 1-3 kg/plant

T U T A N K H A M O N

Tutankhamon is a specially-selected AK47 with extremely high THC production. It is a 60% sativa and 40% indica plant which makes very good mother plants from which to take cuttings. This is not only due to the pure quality of the plant but also because of the relatively compact structure and its large number of branches which provide many cuttings (a.k.a. clones).

FLOWERING TIME: 60 Days

BREEDER: Pyramid Seeds

YIELD: Indoors: 600 gr/m²
Outdoors: 500 - 1500 gr/plant

L A U G H I N G

B U D D H A

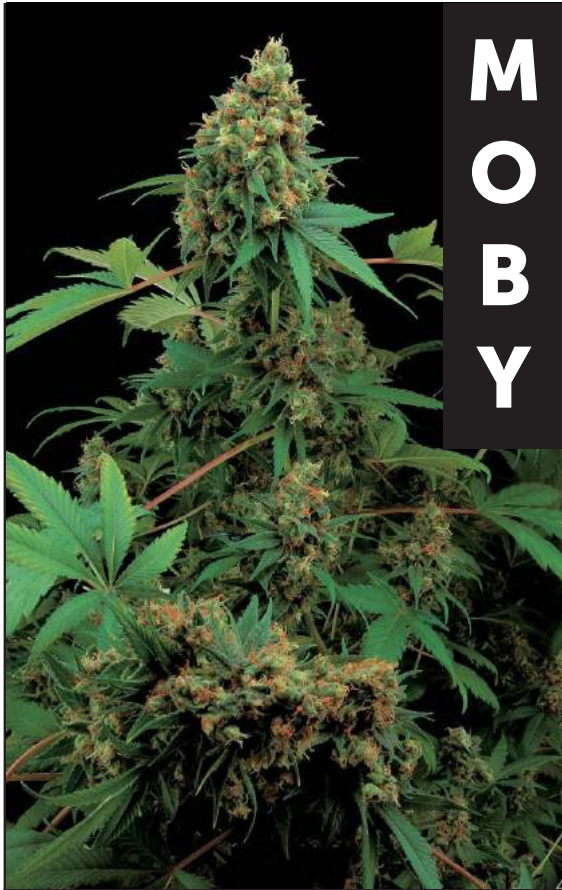

Laughing Buddha is an 80% sativa strain that is a cross between a land-race Thai and Barney's own Jamaican hybrid. It produces an archetypal sativa effect that provides a rush of energy. Laughing Buddha exudes the intensely sweet perfume of ripe, tropical fruits and is one of Barney's most fragrant marijuana strains. It was awarded the 3rd Prize Cannabis Cup (HTCC) 2003.

FLOWERING TIME: 70-75 Days

BREEDER: Barney's Farm

YIELD: Indoors: 600 gr/m²

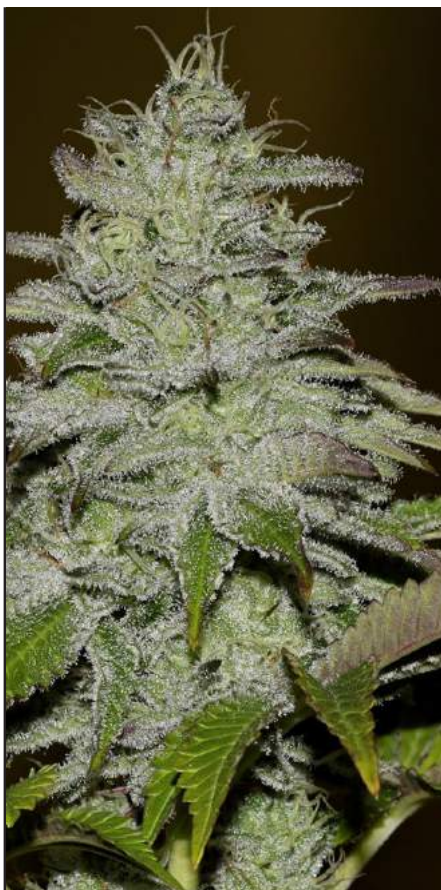

M O B Y D I C K

Moby Dick is quite possibly Dinafem's most well-known and celebrated sativa-dominant cannabis strain. It was created by crossing the best indica and sativa genetic lines that Dinafem had in its possession, a Haze and a White Widow, and is a highly psychoactive strain. It grows indoors and outdoors in temperate/mediterranean-style climates, thriving with plenty of light, and it has very good resistance to mold! It's quite a hungry strain of cannabis so feed it plenty of nutes.

FLOWERING TIME: 60-70 Days

BREEDER: Dinafem

YIELD: Indoors: 650 gr/m²
Outdoors: up to 1500 gr/plant

G I R L S C O U T C R A C K

A cross of two perennially popular strains; Green Crack and Girl Scout Cookies, Girl Scout Crack retains the most sought after traits of both its parents. Combining the invigorating energy and focus of the sativa-dominant Green Crack with the euphoric relaxation of indica-dominant Girl Scout Cookies, this strain enables users to find a perfect balance between vitality and respite.

FLOWERING TIME: 7-9 Weeks

BREEDER: Seedsman

YIELD: High

C H O C O L A T E

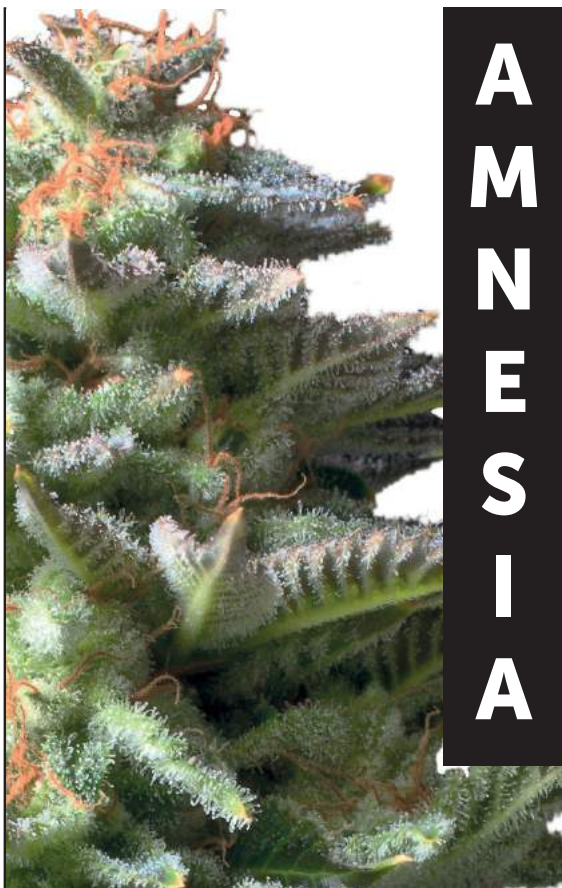

M I N T O G

Chocolate Mint OG manages to combine the delicious flavours of chocolate and mint in one marijuana package! It was created by crossing an Emerald OG with a Granddaddy Purple. This is an indica-dominant strain with 80% indica genetics. Chocolate Mint OG develops lovely shades of blue and purple during flowering with lower night temperatures.

FLOWERING TIME: 58-63 Days

BREEDER: Humboldt Seed Organization

YIELD: Indoors: 350-500 gr/m²
Outdoors: 1-2 kg/plant

A M N E S I A

H A Z E

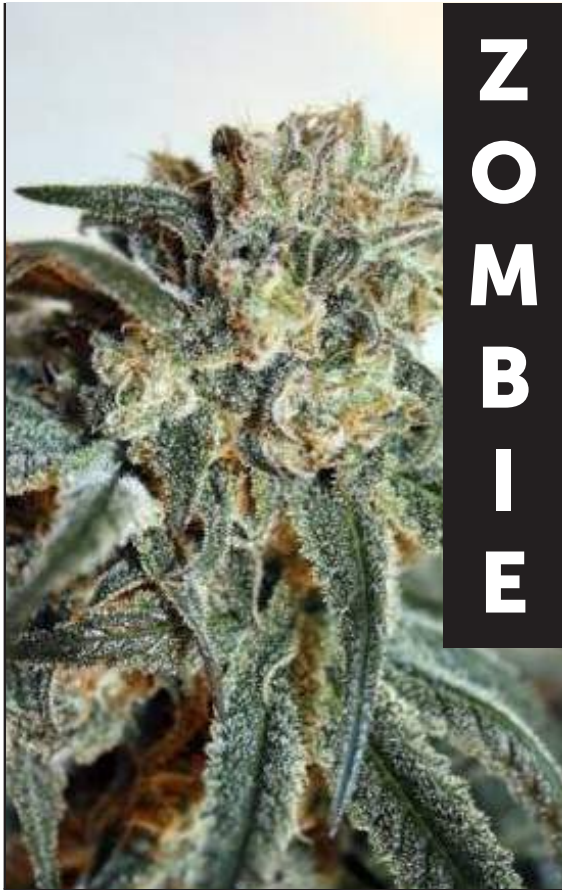

Amnesia Haze was originally created crossing one of the then new Haze hybrid strains with an original Haze male plant. It is 70% sativa and 30% indica. Amnesia Haze produces high levels of THC and is a great yielder. This is primarily an indoor cannabis strain, certainly if grown in higher latitudes. Its 12 week flowering period means that only in warm and very warm regions is the weather good enough late in the season to ensure a good harvest.

FLOWERING TIME: 12 Weeks

BREEDER: Royal Queen Seeds

YIELD: Indoors: 600-650 gr/m²
Outdoors: 700 gr/plant

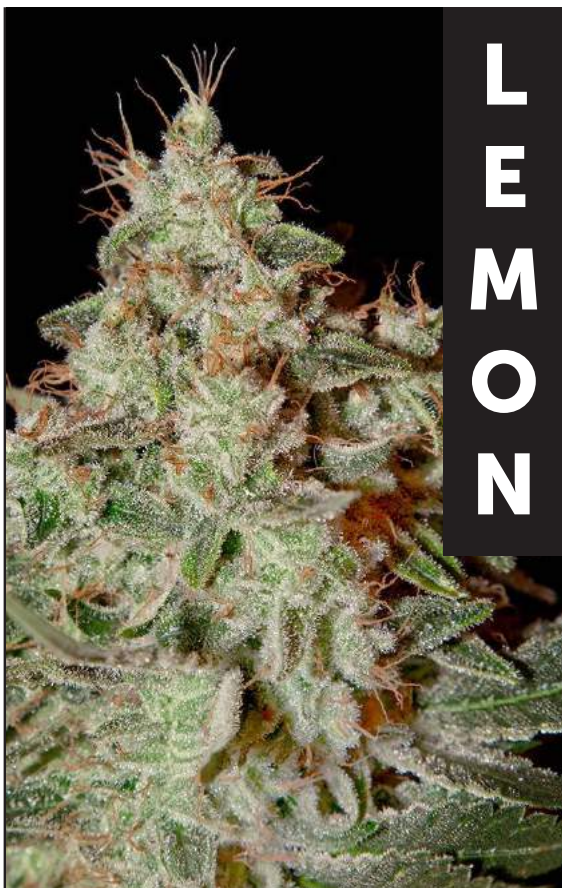

ZOMBIE KUSH

From the selection of one of Ripper Seeds first genetic search works, an old Lavender Kush clone was pollinated by their brilliant Amnesia. From there a clone that they named "Sideral" was selected and they decided to pollinate it again later with their Bubba Kush. Its vegetative cycle should be generous if you want to develop the full potential of its Indica demeanor.

FLOWERING TIME: 55-60 Days

BREEDER: Ripper Seeds

YIELD: Medium-High

LEMON SKUNK

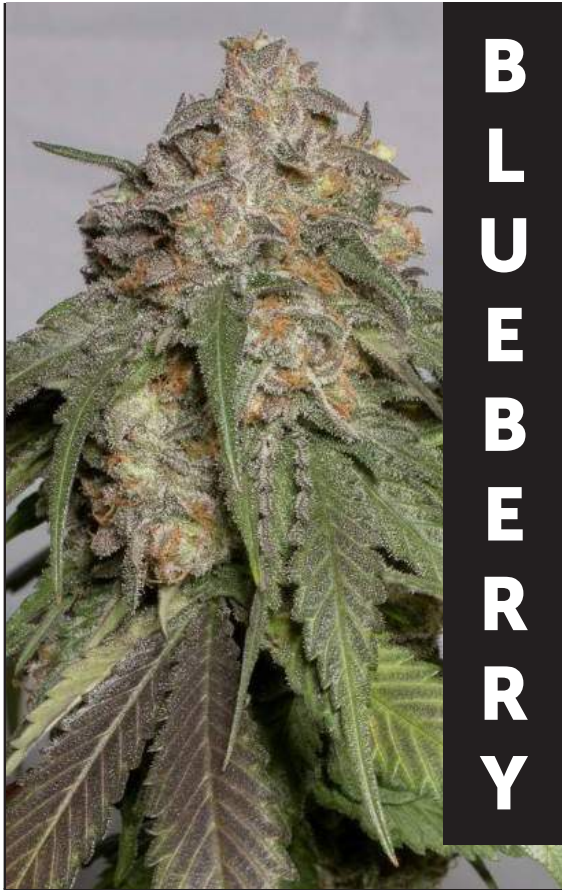

This Lemon Skunk was created by crossing a Skunk plant with a Citral from Pakistan. It is a 50/50 indica/sativa strain which grows like a vine with long spaces between inter-nodes and therefore it responds very well to training. Lemon Skunk will need to be controlled indoors either by using the technique known as ScroG or with LST (low stress training). Yields are enhanced in this way by exposing all budding sites to the light.

FLOWERING TIME: 8 Weeks

BREEDER: Greenhouse Seeds

YIELD: Indoors: 800 gr/m²
Outdoors: 800 gr/plant

B L U E B E R R Y

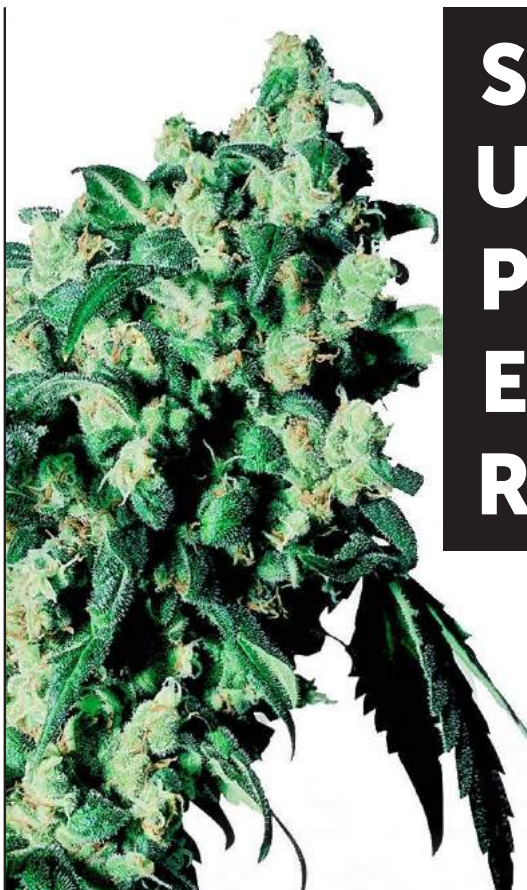

H E A D B A N D

Blueberry Headband feminised was originally bred from our F3 Emerald Headband male crossed with DJ Short's original Blueberry. It continued to be worked on and developed to produce this stable F2 plant with improved yield, greater resistance to pests and climatic conditions and refined flavour profile. Indoors the flowering period is around 8 weeks with a short vegetative period due to its rapid vertical growth.

FLOWERING TIME: 63-68 Days

BREEDER: Humboldt Seed Organization

YIELD: Indoors: 375-500 gr/m²
Outdoors: 1-4 kg/plant

S U P E R

S K U N K

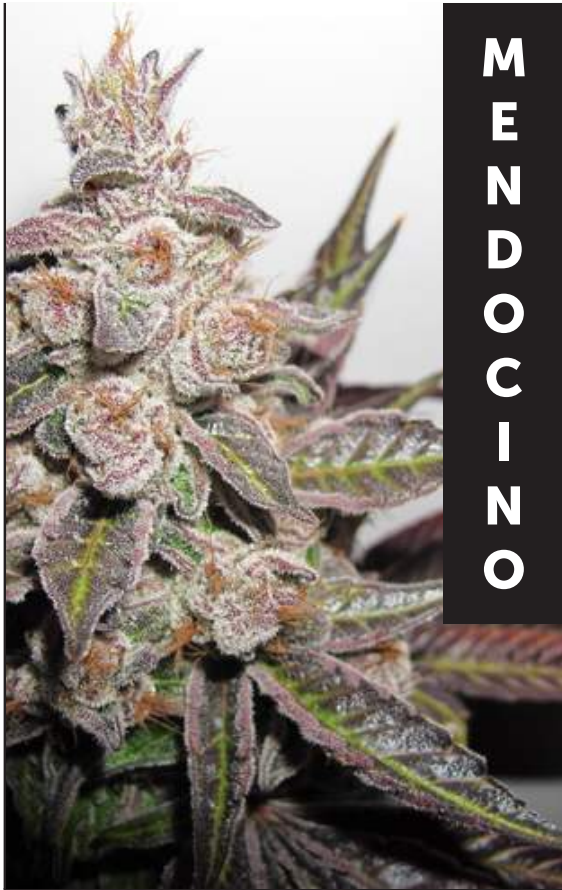

Super Skunk is the result of crossing a Skunk #1 plant with a pure, ancient land-race Afghani hash plant. In its first year of commercial availability it won the Indica Cup at the 1990 HTCC. It is a highly vigorous, potent and aromatic cannabis strain. Super Skunk is a fast-flowering, 80% indica strain that can turn into a beaster tree when grown outdoors.

SEEDS**

MANGOLIAN INDICA

Third Prize Winner High Life Cup 2005 Rocking the Grey Area Coffeeshop for more than four years, her reputation for flavour and strength has become world-renowned. A Sister to Slyder, this variety produces a mostly pure Indica with a fantastic mango bouquet and savoury taste. She is similar to Slyder in potency, but she is much more fragrant. Serrated, sativa-like leaves and beautiful orange pistils dot the crystallized Indicabuds.

FLOWERING TIME: 55-60 Days

BREEDER: Sagmartha Seeds

YIELD: 300-325 gr/m²

OLD TIME INDIANA BUBBLE GUM

Mosca Seeds have taken the famous Indiana Bubble Gum female clone and crossed her with the Sativa dominant Old Time Moonshine male. This elegant combination of superior genetics produces offspring of short, branchy plants that smell like Blueberry bubble gum. The punch these hard colas produce are a joy to the senses.

FLOWERING TIME: 8 Weeks

BREEDER: Mosca Seeds

YIELD: Moderate

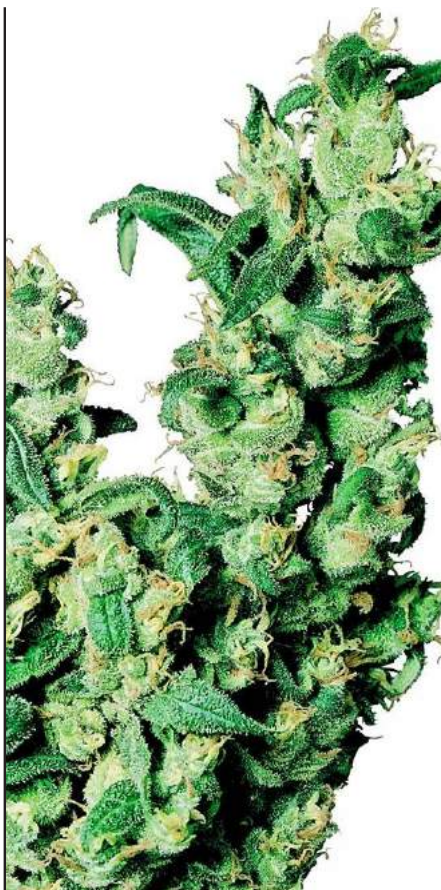

AK-47

This easy to grow strain is one of the most popular. It is of medium height and produces good yields quite quickly. It is an extremely strong smoke, and in turn has a very strong odour. The name was given not out of any idea of violence, but more in association with the 'one hit wonder' that the smoke is. These plants have a short flowering period for a sativa, producing compact, not too leafy buds that gleam with a coat of resincrystals.

FLOWERING TIME: 8-9 Weeks

BREEDER: Serious Seeds

YIELD: High

JACK HERER

Jack Herer is a total legend - whether in cannabis polemicist or in cannabis seed form! Sensi Seeds named this fabulous indica/sativa cannabis strain in honour of all the good works carried out by this latter-day cannabis prophet. It is a multi-award winning strain. Jack Herer the plant resulted from many, many generations of breeding and a rigorous selection process. It has been awarded more Cup victories than any other strain and this continues to this day.

FLOWERING TIME: 7-10 Weeks

BREEDER: Sensi Seeds

YIELD: High

V A N I L L U N A

Vanilluna (aka Vanilla Moon) a structurally Kush hybrid of a cross between a female Blueberry Sativa (from the exact same seed stock that produced the mother of the Blue Satellite; the mother of the Vanilluna being large, green, symmetric with a distinct dominant main-stem and compact nodes, little variegation and long side-branches) crossed with the Original Blueberry male (a stretch indica).

SOUTH AFRICAN

KWAZULU

South African Kwazulu is a wild, pure sativa land-race cannabis strain that grows freely on the north-facing slopes of the Drakensberg ridge. It is a fast-flowering strain that will even mature fully outdoors in northern Europe. Kwazulu has been grown by Zulus for many generations since the reign of Shaka, a historically and culturally important African warrior and farmer.

GRAND DADDY

PURPLE

Grand Daddy Purple was founded and introduced into the Bay Area by Ken Estes in 2003. Soon after its introduction the medical marijuana strain took the California Collective scene by storm. The buds are a stunning deep purple which follow throughout except for the occasional eye stopping light neon green spots. With almost zero hairs on them, the crystal formations are outstanding. They really look like they were dipped and rolled in sparkling stardust.

FLOWERING TIME: 8-14 Weeks

BREEDER: Grand Daddy Purp

Original Skunk #1 was originally created by Sacred Seeds on the west coast of the USA during the second half of the 1970s. Bred by crossing an Afghani Indica, Acapulco Gold Mexican Sativa and a Colombian Gold sativa. It was the very first stabilised hybrid to be introduced to the burgeoning Dutch growing scene. It was then commonly called "sinsemilla".

Critical Mass is an updated version of the old strain Big Bud. It is a cross of a particularly heavy-yielding Afghani plant with Skunk #1. Great commercial strain but one that also deliver a strong stone as well. Critical Mass grows enormous, dense buds that have been called "donkey dicks". Growers indoors and outdoors are warned to keep a close eye on their plants as they near maturation as the density of the buds means that they are susceptible to mold if air-circulation is sub-standard and/or humidity is too high.

FLOWERING TIME: 8 Weeks

BREEDER: Mr Nice Seeds
